ABSTRACT:

A novel achiral biaryl-type compound and a circular dichroism (CD) color fixing agent are provided. Furthermore, a method for determining an absolute configuration of a chiral compound is carried out by introducing the above achiral biaryl-type compound into the chiral compound.

Abstract Paragraph - ABTX (1):

A novel achiral biaryl-type compound and a circular dichroism (CD) color fixing agent are provided. Furthermore, a method for determining an absolute configuration of a chiral compound is carried out by introducing the above achiral biaryl-type compound into the chiral compound.

Title - TTL (1):

Biaryl-type compounds, CD color fixing agent and method for determination of absolute configuration

Summary of Invention Paragraph - BSTX (3):

[0002] This invention relates to a biaryl-type compound, a circular dichroism (CD) color fixing agent for introducing a CD chromophore into a chiral compound and a method for determination of absolute configuration of a chiral compound.

Summary of Invention Paragraph - BSTX (15):

[0013] Another object of the invention is to provide a new CD color fixing agent by introducing a CD chromophore into a chiral compound.
